# **How to connect to the wireless network & printer**

Mac – OS X

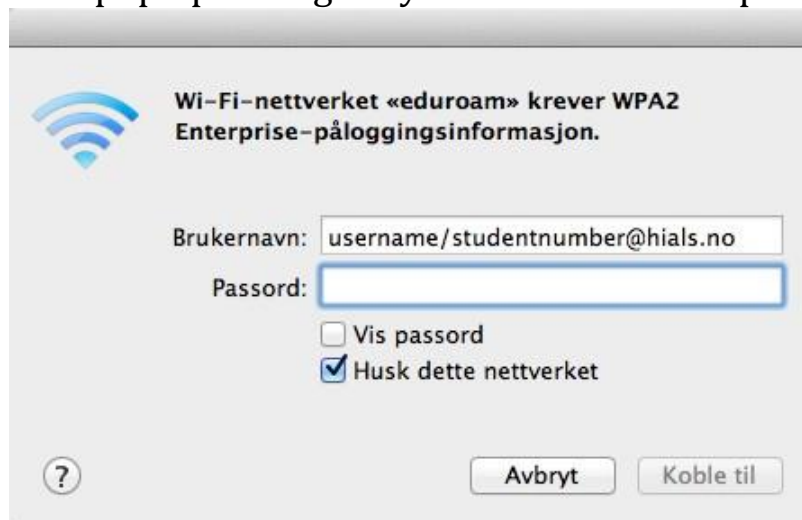

## How to connect to the wireless network

Click the Wi-Fi icon at the top right  and make sure it's turned on, then click the **eduroam** network from the drop-down menu.

A box will pop up asking for your username and password

A screenshot of the macOS Wi-Fi password prompt. The title bar says 'Wi-Fi-nettverket «eduroam» krever WPA2 Enterprise-påloggingsinformasjon.' There is a Wi-Fi icon on the left. Below the title, there are two input fields: 'Brukernavn:' with the text 'username/studentnumber@hials.no' and 'Passord:' with an empty field. Below the password field, there are two checkboxes: 'Vis passord' (unchecked) and 'Husk dette nettverket' (checked). At the bottom, there is a question mark icon, an 'Avbryt' button, and a 'Koble til' button.

**Students:** Fill in username (studentnumber@hials.no) and password (same as Fronter)

**Employees:** Fill in username (initials@hials.no) and password (same as in the office)

## How to connect to the printer

First you need to download the driver. Go to <http://tinyurl.com/hialsmac107> and press the download button to the right on **Mac OS X 10.7 “PPD Installer”**.

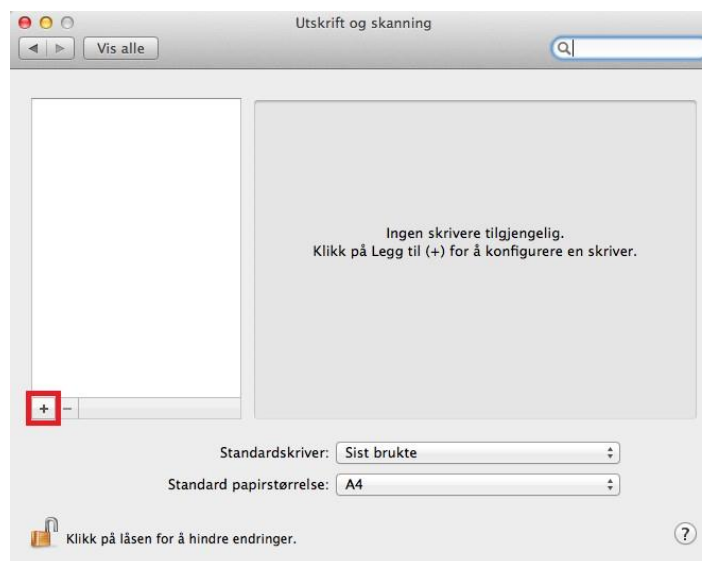

**PS! If you have updated to Mac OS X 10.8, choose that one from the list**

Description	Version	Update	File size	Download
<a href="#">PPD Installer</a>	<a href="#">Ver.2.0.0</a>	14/01/2010	201 KB	

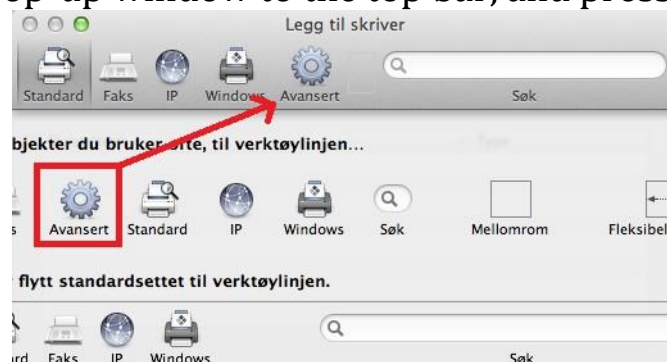

Install it normally like any other program.

Go to “**System Preferences**”, and then “**Print & Scan**”.

Now press the “+” button to get started.

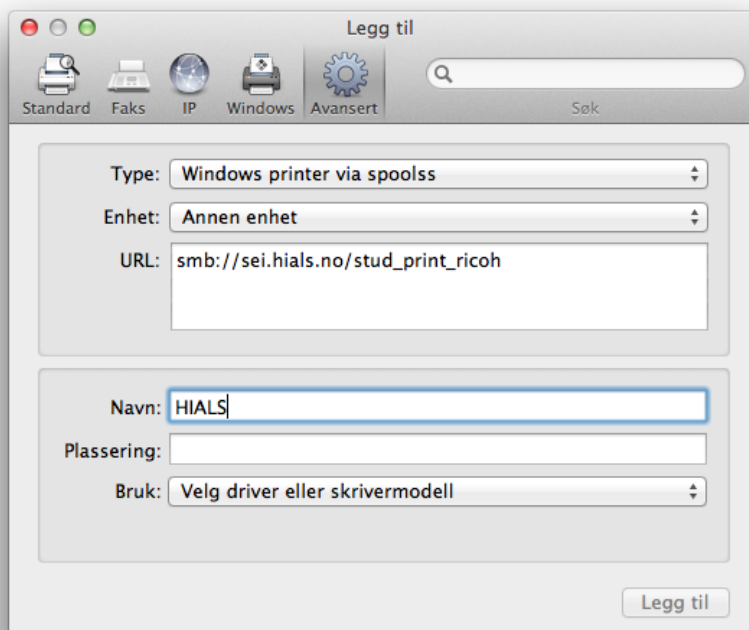

Right-click the grey line on the top next to the IP, Windows etc. icons, and press “**Customize toolbar**”, then drag the “**Advanced**” icon from the pop-up window to the top bar, and press finish.

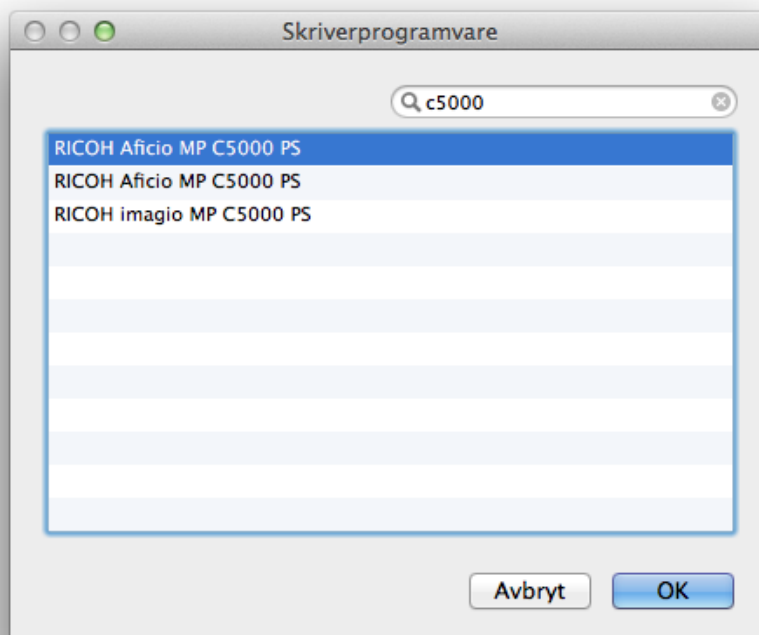

## Aalesund University College – OS X

Go to the “**Advanced**” tab and wait for it to finish the search.  
Enter the same settings as shown in the picture below.

On “**Use (Bruk)**”, choose “**Select Printer Software... (Velg skriverprogramvare...)**” and find the driver you installed earlier. If you search for “**C5000**” you should find it.

Now press “**OK**”, and wait.

## Aalesund University College – OS X

When the new configuration window appears, leave everything as it is, except for the last one, choose the “**SR3030**”

Press “**Ok**”.

**NOTE:** Color settings will be set to colors standard, read further.

Now open any document and press print to access printer settings. Here are the different settings.

### **For 2-sided prints:**

Press Copies & Pages, choose Layout. And you can enable or disable double sided printing.

Now press “**Layout**” again, and choose “**Printer Features**”. You now get a list of different “**Feature Sets**”, explained below.

### **Color/Black & White:**

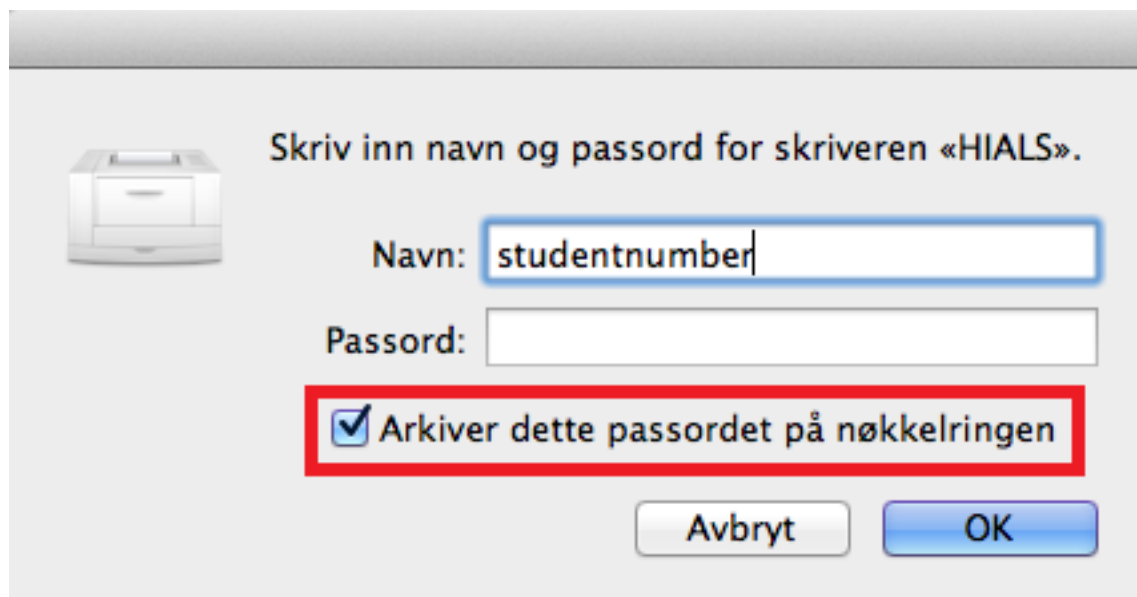

**General 1.** “Color Mode” is the only thing you need to worry about here, chose between color or black an white.

### **Staples (Stifter) and Punch (Hull):**

**General 3.** Look at the Staples and Punch roll-down menu’s to chose what and how much you would like.

## Aalesund University College – OS X

The first time you try to print, it will pop up asking for your password. Log in normally with your student number and password, and remember to check **archive password** to make sure it doesn't ask every time.

Skriv inn navn og passord for skriveren «HIALS».

Navn: studentnumber

Passord:

Arkiver dette passordet på nøkkelringen

Avbryt OK

If you have any further problems, do not hesitate to contact Orakeltjenesten.
